

Data sheet

AB-QM 4.0 / AB-QM Pressure Independent Control Valves (PICV) DN 15-250

Description

The Danfoss AB-QM is a Pressure Independent Control Valve (PICV) that combines high accuracy and durability with market leading user-friendliness. The design of the AB-QM is fully geared towards making your project run on time and on budget while delivering the most efficient HVAC system.

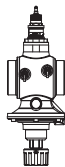

Pressure independent valves are control valves with an automatic balancing function. An in-built pressure controller keeps a constant differential pressure over the control valve, ensuring full authority and automatic flow limitation. By combining two functions in one, control and automatic hydronic balance, Danfoss PICVs provide a cost-efficient solution for the challenges faced by forward-looking designers of HVAC systems. AB-QM can be used also in Industrial refrigeration systems.

The Danfoss AB-QM delivers the lowest total cost of ownership because:

- Precise flow limitation ensures always the right flow at the right time, ensuring minimized pumping energy
- Full range from DN 15 to DN 250 for flows up to 407 m³/h
- Available with internal and external thread for universal applicability
- Danfoss' durability test ensures the AB-QM has best-in-class resistance to scaling and clogging
- Easy troubleshooting because of the always visible setting and the ability to measure flow through test plugs
- Minimum hysteresis for stable and precise temperature control
- Future-ready with a range of smart actuators, ready for data driven and optimized HVAC 4.0

¹⁾ Factory setting of the valve is done at nominal setting range.

²⁾ Regardless of the setting, the valve can modulate below 1 % of set flow.

³⁾ At min differential pressure valve reaches at least 90% of nominal flow. Declaration of performance is available upon request.

^{*)} If the medium temperature when using AB-QM is below 2 °C, than ice forming on the spindle must be prevented, therefore valve should be insulated with vapor tight insulation. AB-QM DN15-100 were tested for performance and durability with ethylene as well as propylene glycol in a concentration of 50%. Higher concentrations are possible, but for compatibility of different coolants for PICV's, please check with the coolant supplier. For AB-QM DN40-100 stem heaters must be used: Code 065Z0315.

Cv - Control valve part

Actuators overview
AB-QM DN 15-32

NovoCon® S

NovoCon® S is a high accuracy multi-functional field bus actuator, specifically designed for use in combination with the Pressure Independent Balancing Control Valve type AB-QM in sizes from DN 15 LF-32 HF. The actuator with AB-QM is used to control water supply to fan coil units, chilled beams, induction units, small re-heaters, re-coolers, AHU's and other terminal units for zone control, in which heating/ chilled water is the controlled medium.

Type	Speed	Power supply	Control signal	Communication protocol	Enclosure	Code No.
NovoCon® S	3/6/12/24 s/mm	24 V ac/dc	0-10 V, 2-10V, 0-20mA, 4-20mA	BACnet MS/TP, Modbus RTU	IP 54 (IP40 if mounted upside down)	003Z8504

AME(V) 110/120 NL

The AME 110 and 120 are high precision modulating gear actuators that can be mounted on the AB-QM for precise control. They have a calibration function so the travel of the actuator always matches the stroke of the AB-QM perfectly. The actuator is suitable for both linear and logarithmic characteristics. The AME(V) 110/120 fits to AB-QM DN 15 LF to DN 32 HF.

Type	Speed	Feedback signal	Power supply	Control signal	Enclosure	Code No.
AME 110 NL	24 s/mm	No	24 V ac	0-10 V, 2-10V, 0-20mA, 4-20mA	IP 42	082H8057
AME 120 NL	12 s/mm	No				082H8059
AME 110 NLX	24 s/mm	Yes		3 point		082H8060
AMV 110 NL	24 s/mm	No				082H8056
AMV 120 NL	12 s/mm	No			082H8058	

AME 13 SU/SD

The AME 13 is a precision gear actuator that has a built-in spring that will close the valve (Spring Down, SD) or open the valve (Spring Up, SU) if the power on the actuator is lost. The characteristic can be set to Logarithmic or Linear with a dip switch. The AME 13 SU/SD fits to AB-QM DN 15 LF to DN 32 HF.

Type	Speed	Spring	Power supply	Control signal	Feedback signal	Enclosure	Code No.
AME 13 SU-1	14 s/mm	Spring to open	24 V ac	0-10 V, 2-10V, 0-20mA, 4-20mA	0-10 V, 2-10V	IP 54	082H5006
AME 13 SD-1		Spring to close					082H5007

AME 113

The AME 113 are modulated controlled gear actuators that has a build in battery operated function that opens or closes the valve if the power on the actuator is lost. The AME 113 has a logarithmic characteristic. They have a calibration function so the travel of the actuator always matches the stroke of the AB-QM valve. The AME 113 fits to AB-QM DN 15 LF to DN 32 HF.

Type	Speed	Safety function	Power supply	Control signal	Feedback signal	Enclosure	Code No.
AME 113 NL SD	15 s/mm	Closes the valve	24 V ac/dc	0-10 V	-	IP 54	082H5007M
AME 113 NL SU		Opens the valve					082H5008
AME 113 NLX SD		Closes the valve			0-10 V		082H5000
AME 113 NLX SU		Opens the valve					082H5001

ABNM-A5

The ABNM is a thermal modulating actuator. It can be used to modulate the AB-QM if speed or precision is not the first concern. ABNM has either a Logarithmic (LOG) or a Linear (LIN) characteristic which should be chosen to fit the application. It is available in Normally Open (NO) and Normally Closed (NC) versions, as well as in 24V DC and AC. The ABNM-A5 fits to AB-QM DN 15 LF to DN 32 HF.

Cables	Code No.
1 meter	082F1081
5 meter	082F1082
10 meter	082F1083

Type	NO/NC	LOG/LIN	Supply voltage	Stroke	Full stroke time	Enclosure	Code No.
ABNM-A5	NC	LOG	24 V ac	5 mm	3-5 min	IP 54	082F1160
ABNM-A5	NC	LIN		5 mm			082F1161
ABNM-A5	NC	LOG		6.5 mm			082F1162
ABNM-A5	NO	LOG		6.5 mm			082F1163
ABNM-A5	NC	LIN		6.5 mm			082F1164
ABNM-A5	NO	LIN		6.5 mm			082F1165
ABNM-A5	NC	LOG	24 V dc	6.5 mm	082F1166		
ABNM-A5	NO	LOG		6.5 mm	082F1167		

Note: ABN & ABNM A5 with 5mm stroke are only able to open AB-QM DN 25-32 90%.

TWA-Q

TWA-Q is a thermal actuator that is used for On/Off applications, where control precision and speed are not prioritized. It is available in Normally Open (NO) and Normally Closed (NC) versions and in 24 and 230 Volt. TWA-Q has a position indicator to show if it is open or closed. The TWA-Q fits to AB-QM DN 15 LF to DN 32 HF.

Type	NC/NO	Voltage	Stroke	Full stroke time ¹⁾	Enclosure	Code No.
TWA-Q	NC	230V AC	5 mm	<3 min.	IP 54	082F1600
TWA-Q	NO	230V AC	5 mm			082F1601
TWA-Q	NC	24V AC/DC	5 mm			082F1602
TWA-Q	NO	24V AC/DC	5 mm			082F1603

Closing point (measure) for DN 15-32

¹⁾ at room temperature.

**Actuators overview
AB-QM DN 40-100**

NovoCon® M

NovoCon® M is a high accuracy multi-functional field bus actuator, specifically designed for use in combination with the NovoCon Pressure Independent Balancing Control Valve type NovoCon AB-QM in sizes from DN 40-100, please see separate data sheet. The NovoCon® M actuator with AB-QM is used in air handling units AHU, chillers and distribution station applications.

Type	Speed	Power supply	Control signal	Communication protocol	Enclosure	Code No.
NovoCon® M	3/6/12/24 s/mm	24 V ac/dc	0-10 V, 2-10V, 0-20mA, 4-20mA	BACnet MS/TP, Modbus RTU	IP 54	003Z8540

AME 435 QM

The AME 435 QM is a high precision modulating gear actuator that can be mounted on the AB-QM for precise control. It has a calibration function, so the travel of the actuator always matches the stroke of the AB-QM perfectly. The actuator is suitable for both linear and logarithmic characteristics. The AME 435 QM fits to AB-QM DN 40 to DN 100 HF.

Type	Speed	Power supply	Control signal	Feedback signal	Enclosure	Code No.
AME 435 QM	7.5/15 s/mm	24 V ac/dc	0-10 V, 2-10V, 0-20mA, 4-20mA	0-10 V, 2-10V	IP 54	082H0171

AME 25 SU/SD

The AME 25 SU/SD is a precision gear actuator that has a built-in spring that will close the valve (Spring Down, SD) or open the valve (Spring Up, SU) if the power on the actuator is lost. The characteristic can be set to Logarithmic or Linear with a dip switch. The AME 25 SU/SD fits to AB-QM DN 40 to DN 100 HF.

Type	Speed	Power supply	Control signal	Feedback signal	Enclosure	Code No.
AME 25 SD	15 s/mm	24 V ac	0-10 V, 2-10V, 0-20mA, 4-20mA	0-10 V, 2-10V	IP 54	082H3038
AME 25 SU						082H3041

Please consider adapter is needed **003Z0694**

**Actuators overview
AB-QM DN 125-150**

AME 55 QM

AME 55 QM and AME 655-1 actuators are used with pressure independent balancing and control valve type AB-QM DN 125 and DN 150.

Type	Speed	Power supply	Control signal	Feedback signal	Enclosure	Code No.
AME 55 QM	8 s/mm	24 V ac	0-10 V, 2-10V, 0-20mA, 4-20mA	0-10 V, 2-10V	IP 54	082H3078

AME 655-1

Type	Speed	Power supply	Control signal	Feedback signal	Enclosure	Code No.
AME 655-1	2/6 s/mm	24 V ac/dc	0-10 V, 2-10V, 0-20mA, 4-20mA	0-10 V, 2-10V, 0-20mA, 4-20mA	IP 54	082H5010

AME 658 SU/SD-1

AME 658 SU/SD-1 actuator is used together with pressure independent balancing and control valves type AB-QM DN 125 and DN 150. The AME 658 SU/SU-1 is a precision gear actuator that has a built-in spring that will close the valve (Spring Down, SD) or open the valve (Spring Up, SU) if the power on the actuator is lost. The characteristic can be set to Logarithmic or Linear with a dip switch.

Type	Speed	Power supply	Control signal	Feedback signal	Enclosure	Code No.
AME 658 SU-1	4/6 s/mm	24 V ac/dc	0-10 V, 2-10V, 0-20mA, 4-20mA	0-10 V, 2-10V, 0-20mA, 4-20mA	IP 54	082H5012
AME 658 SD-1						082H5011

All actuators type "-1" are UL certified.

NovoCon® L

NovoCon® L is a high accuracy multi-functional fieldbus actuator, specifically designed for use in combination with the Pressure Independent Control Valve type AB-QM in sizes from DN 125-150 used in air handling units AHU, chillers and distribution station applications. NovoCon® L SU/SD has a built-in a spring that will close the valve (Spring Down, SD) or open the valve (Spring Up, SU) if the power on the actuator is lost.

Type	Speed	Power supply	Control signal	Communication protocol	Enclosure	Code No.
NovoCon® L	3/6/12/24 s/mm	24 V ac/dc	0-10 V, 2-10V, 0-20mA, 4-20mA	BACnet MS/TP, Modbus RTU	IP 54	003Z8560
NovoCon® L SU						003Z8561
NovoCon® L SD						003Z8562

Actuators overview
AB-QM DN 200-250

AME 685-1

AME 685-1 are used together with large pressure independent balancing and control valves type AB-QM DN 200 and DN 250.

Type	Speed	Power supply	Control signal	Feedback signal	Enclosure	Code No.
AME 685-1	3/6 s/mm	24 V ac/dc	0-10 V, 2-10V, 0-20mA, 4-20mA	0-10 V, 2-10V, 0-20mA, 4-20mA	IP 54	082H5013

NovoCon® XL

NovoCon® XL is a high accuracy multi-functional fieldbus actuator, specifically designed for use in combination with the Pressure Independent Control Valve type AB-QM in sizes from DN 200- 250 used in air handling units AHU, chillers and distribution station applications.

Type	Speed	Power supply	Control signal	Communication protocol	Enclosure	Code No.
NovoCon® XL	3/6/12/24 s/mm	24 V ac/dc	0-10 V, 2-10V, 0-20mA, 4-20mA	BACnet MS/TP, Modbus RTU	IP 54	003Z8563

In case other types of actuators are needed please contact our local sales representative.

Design

1. Spindle
2. Stuffing box
3. Pointer
4. Control valve's cone
5. Membrane
6. Differential pressure controller spring
7. Shutter
8. Membrane plate
9. Internal impulse tube

Function:

The AB-QM valve consists of two parts:

1. Differential pressure controller
2. Control valve

1. Differential pressure controller DPC

The differential pressure controller maintains a constant differential pressure across the control valve. The pressure difference Δp_{CV} (p_1-p_2) on the membrane is balanced with the force of the spring. Whenever the differential pressure across the control valve changes (due to a change in available pressure, or movement of the control valve) the differential pressure controller is displaced to a new position which brings a new equilibrium and therefore keeps the differential pressure at a constant level.

2. Control valve CV

The control valve has a linear characteristic. It features a stroke limitation function that allows adjustment of the K_v value. The percentage marked on the scale equals the percentage of 100 % flow marked on the pointer. Setting is done by turning the setting knob to the desired position.

Design (continuous)

1. Shut off screw
2. Main spring
3. Membrane
4. DP cone
5. Seat
6. Valve body
7. Control valves cone
8. Locking screw
9. Scale
10. Stuffing box

2. Valve seat
3. DPC cone
4. CV cone
5. Controller casting
6. Rolling diaphragm
7. Adjusting screw
8. Bellow for pressure relief on DPC cone

Presetting

DN 15-32

The calculated flow can be adjusted easily without using special tools. The change of presetting (factory setting is 100% (10) follow steps below:

1. Remove the blue protective cap or the mounted actuator
2. Turn the pointer (clockwise to decrease) to the new setting
3. Clockwise turning would decrease the flow value while counter clock wise would increase it.

DN 15 - 32

Setting: 0 = 0%
10 = 100%

DN 40 - 100

DN 125-250

Method of measurement

AB-QM DN 40-250
 AB-QM DN 15-32

The test plugs are placed in a way that differential pressure p_1-p_2 is measured (see figure 1). Therefore the measured differential pressure can be used to calculate the flow directly. Since the measurements across the measuring points are influenced by the dynamic pressure, turbulences, flow patterns, internal tolerances, setting accuracy and accuracy of the measuring equipment we believe that the total accuracy of the measurement is lower than performance of the valve. However accuracy of the flow measurements will always be within $\pm 10\%$

within setting range 20 - 100 % (DN 15-32) or 40 - 100 % (DN 40-250) and from dp_{min} to dp_{max} .

Therefore we recommend not to adjust the setting when the results are within 10 % of the expected flow.

Calculating the flow

$$\Delta p_{cv} = p_1 - p_2$$

$$Q = kv_{cv} \times \sqrt{\Delta p_{cv}}$$

For kv_{cv} values please follow the link to AB-QM flow checker document:

Service

DN 15-32

For the service shut-off function, the valve can be installed in either supply or return pipe.

DN 40-100

For the service shut-off function, the valve can be installed in either supply or return pipe. Valves are equipped with manual shut-off for isolating function up to 16 bar.

DN 125-250

For the service shut-off function, the valve can be installed in either supply or return pipe. For shut-off set the valve to 0%.

Tender text

A pressure independent balancing and control valve with a linear control characteristic that is independent of the available pressure and setting. Make: Danfoss AB-QM or equivalent.

The pressure independent valve should have the following features:

- Automatic flow limitation function
- Membrane driven design for reduced clogging risk
- Modulating below 1% of set flow, regardless of the setting
- Maximum flow clearly marked on the valve
- Full authority at all settings
- Ability to close against 16 Bar of differential pressure.
- Linear control characteristic
- Linear setting
- Control ratio 1:1000
- Test plugs for pump optimization and flow verification for DN 15-250. Available in the range from DN 15 – 250 from one supplier.
- Option to change the characteristic from linear to equal percentage at all sizes by adjusting actuator settings.
- Leakage rate of no visible leakage (IEC 60534-4:2007 class IV) for DN 15-20 in combination with recommended actuator
- Leakage of 0.05 % of the Q_{nom} for DN 25-100 (IEC 60534-4:2007 class III) in combination with recommended actuator
- Leakage of 0.01 % of the Q_{nom} for DN 125-250 (IEC 60534-4:2007 class IV) in combination with recommended actuator
- Flow measurements via test plugs according to BS7350:1990
